

Installation

Connect the thin white cable in to the grey 'DSL' socket on the back of the router, the other end should go in to your broadband filter.

Take the black power cable, plug one end in to the back of router in the round hole and plug the other end in to a plug socket. Switch on the router by pressing the power button.

If you wish to set this router up via Ethernet please use another Ethernet cable plugged in to a yellow socket on your router, with the other end connected to your laptop or computer. If you wish to use WiFi, the wireless key is located on the underside of your router or on a plastic card.

Setup

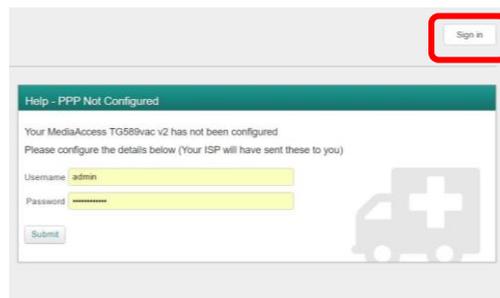

The router can be set up with either a Laptop, Computer or a Tablet. A Smart Phone can be used, but this is not preferable.

Please connect your device to the router, either by connecting to the WiFi or using an Ethernet cable connection.

Once you have connected to the router, a window should appear in front of you advising that the PPP is not configured. When this appears please press 'Sign In' in the top right corner.

If this page does not open up automatically, once connected to the router, please open up your internet browser (Chrome, Safari, Firefox, Edge etc..) and in the address bar at the top please enter either 192.168.1.1 or dsldevice.lan

This should bring up a Technicolor page, then please press 'Sign In' in the top right corner of the page.

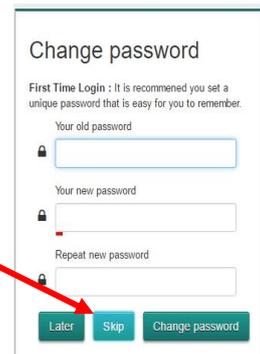

When asked to Sign In, please enter the following:

Username – admin

Password – admin

Press 'Sign In'

You may asked to change the login password, please press the 'Skip' button.

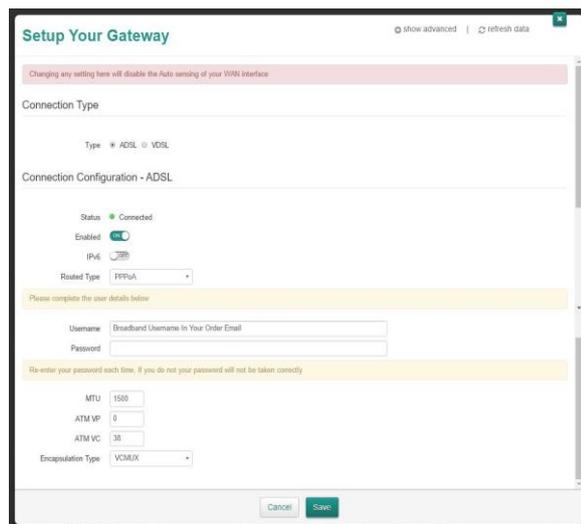

Now that you are logged in to the router, inside the Gateway box please press 'Setup your Gateway'.

A new window will open.

Please disregard the warning at the top of the page regarding auto sensing

Please ensure the following is selected

- Connection Type : ADSL
- Enabled : On
- IPv6 : Off
- Routed Type : PPPoA
- Username : This is your broadband username which is in your order E-Mail
- Password : This is your broadband password which is in your order E-Mail
- MTU : 1500
- ATM VP : 0
- ATM VC : 38
- Encapsulation Type : VCMUX

Please press 'Save'. On certain devices you may not be able to see the 'Save' icon, you may need to zoom out to see it. On Apple devices, you need to pinch your screen to zoom out. Once saved you should see that your 'Changes saved successfully'

Press the 'Close' button at the bottom of the page and you will return to the page with all the green boxes. As long as the setup was successful, in the 'Internet Access' box at you should see PPP Connected.

You are now Online!
